Steel Rotating Mezzanine Safety Gate System 53 In. x 53 In. x 42-3/16 In. 5,000 Lb. Capacity Yellow

MODEL MEZZ-R5-4848

Protective Barriers / Rotating Mezzanine Safety Gate System

PRODUCT OVERVIEW

Safety has always been the number one priority of the rotating mezzanine system. The rotational design can be maneuvered into different positions with minimal manual labor, simplifying the loading unloading process. The mezzanine system includes three gated sides and one open side, ensuring security and stability of both personnel and items. The single open mezzanine side enables pallets and boxes to be transferred safely and efficiently. An extended height, raised lip, on the three gated sides limit possible slide-offs of any small items. Unit includes a yellow and black powder coat finish for baked in added toughness.

KEY FEATURES

- Simple manual turning operation for movement of products
- Secure access point for pallets and goods
- Durable steel construction
- Rotates 360 degrees
